

A **c**old home may be putting your client's health at risk...

Cold homes cost the NHS in England £1.36 billion every year in hospital and primary care. If your client suffers from a **cardiovascular disease** or **respiratory illness**, we can offer*:

- Grants of up to £2,500 for homeowners for energy efficiency improvements
- Free surveys to identify potential risks to health for homeowners and private tenants
- Benefits checks, fuel debt mediation and assistance with switching energy tariff or supplier from a dedicated Citizens Advice caseworker

Help reduce the health impacts of cold homes by referring your client to us today
