Registered Charity No. 298951

www.nef.org.uk
The National Energy Foundation is an independent charity that has been at the forefront of improving the use of energy in buildings since it was founded.

We aim to give people, organisations and government the knowledge, support and inspiration they need to understand and improve the use of energy in buildings.

We do this through:

- Providing practical experience and technical expertise, gained from a broad range of feasible projects.
- Sharing examples of energy improvements and what mean for comfort, health, costs and affordable living.
- Helping organisations plan and implement energy savings across building portfolios, existing more investment in core business and operations.
- Connecting stakeholders and creating forums to share experience and drive forward the frontiers of good practice.
- Bringing together partners and providing expertise to research and develop tools and knowledge, resulting in building energy improvements.
- Working with stakeholders across the building supply chain to deliver better performing new and refurbished buildings.
- Providing practical experience and technical expertise, and drive forward the frontiers of good practice.
- Helping people and organisations to succeed through the provision of impartial, comprehensive advice.
